**DETAILED ACTION**

The restriction requirement dated February 16, 2005 has been withdrawn in view of Applicant's arguments in the Remarks of the Amendment filed April 4, 2005. A new restriction requirement is set forth below:

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a method for making a trench wall in the ground, classified in class 037, subclass 195.
- II. Claims 5 and 7-13, drawn to a trench wall cutter for making a cut trench accompanied by the formation of a free space and a trench wall cutting device for making a trench wall, classified in class 037, subclass 142.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus that does not require the frame to have a cross-section smaller than the cross-section of the cut trench.

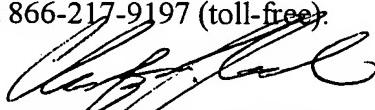

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher J. Novosad whose telephone number is 571-272-6993. The examiner can normally be reached on Monday-Thursday 5:30am-4:00pm.
